About

I am a highly effective professional with a mindset centered around innovation, professionalism, and creativity. I enjoy working closely with a team, contributing an upbeat energy and positive attitude, seeing projects from concept to completion. Combining the flexibility of creative problem solving with an enduring work ethic, I bring a "work smart and hard" attitude to the team.

Work History

Owner/Designer

Stedfast Design Co. / June 2014 - Present

- Designed exclusive high-end custom furniture and products.
- Met with clients to establish customer specifications, drawings and proposals.
- Worked within specific timelines and budgets to ensure quality work and customer satisfaction.

Fabrication Specialist

Arrowhead Studios / September 2019 - August 2020

- Quoting and estimating fabrication and machining time and costs.
- Managing supplies, orders and build logistics. Maintaining accurate records of materials for job orders, monitoring cost and delivering targets.
- Working closely to ensure communication channels are open and effective to project timeline risks and customer expectations are met.
- Interacting with clients in design – strong communication skills necessary to understand and deliver specific design technical elements.
- Assisting in developing and setting goals for our team to coordinate project expectations. High level of detail-oriented work requirements.

Wood Studio Manager

NC State University / May 2014 - August 2018

- Created and scheduled year around classes – 100% fill rate with waitlists. Promoted classes through social media, events and local advertising. Introduced new technology & courses.
- Managed and supervised a team of 10 – Planned and established work schedules and production sequences to meet production goals.
- Conducted employee and student training to ensure work/safety policy and procedures were being met. Handled hiring, evaluations and promotions.
- Maintained operations data, such as cost, time and production record and prepare management reports. Determine standards for budgets, production goals, equipment availability and workloads. Provide recommendations to improve production methods, equipment performance or product quality, as well as, employee morale.
